----- SPRINT 1 REPORT -----

Product Name: Data Visualization Climate Change

Team Name: Data Visualization

Sprint Completion Date: February 2, 2018

----- ACTIONS TO STOP DOING -----

We should stop being too general in our topics and discussions. This made us underestimate certain tasks such as learning d3. Stop working locally and push more after each session.

----- ACTIONS TO START DOING -----

We should be more specific on what needs to be done. We need to find more unique ways of visualization and a way to use our data files. Let others know if there's any success in unique or difficult visualizations or feature. Split tasks to learn and teach others on it. Not wasting time.

----- ACTIONS TO KEEP DOING -----

Our meetings times work well for us. Keep trying to understand example code that didn't work for us. Keep communicating and showing up on time.

----- WORK COMPLETED / NOT COMPLETED -----

Completed: User Story 1: We found global data resources for our topics

Completed: User Story 2: We learned some D3, however we haven't fully learned it. We have completed a total of 3 visualizations for each user.
Incompleted: User Story 2: We haven't completely finished learning D3 and we haven't completed our 5 visualizations.
Completed: We have made a barebone website with a visualization. We also have a firebase.
Completed: User Story 4: We have consolidated logistics and have frameworks.

----- WORK COMPLETION RATE -----

Total User Stories Completed: 4

Total Hours Completed: ~30-40
